## VOLUME XIX

## TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

November, 1931—June, 1932

**B**

Bates, A. Allan ..... 449
Brophy, G. R. ..... 385
Brumfield, R. C. ..... 333

**C**

Cunningham, J. F. ..... 624

**D**

Doan, Gilbert E. ..... 752

**E**

Eckel, John F. ..... 577
Egan, John J. ..... 481
Emmons, Joseph V. ..... 289

**F**

Fuller, T. S. ..... 97

**G**

Gensamer, M. ..... 577
Gilchrist, James ..... 624
Goss, N. P. ..... 182
Grant, Leland E. ..... 165
Greene, O. V. ..... 501

**H**

Harder, Oscar E. ..... 41
Harrington, R. H. ..... 385
Hensel, F. R. ..... 639
Herty, Charles H., Jr. .....1, 271

**J**

Jacobs, J. E. ..... 271
Jominy, W. E. ..... 193

**K**

Kelley, Floyd C. ..... 233
Kinzel, A. B. ..... 438

**L**

Larsen, E. I. ..... 639
Luerssen, G. V. ..... 501

**M**

Mathewson, C. H. ..... 66
Milligan, W. E. ..... 66
Murphy, D. W. ..... 193

**N**

Newell, H. D. ..... 673

**R**

Reed, E. L. ..... 89
Rogers, B. A. ..... 553
Rosenberg, Samuel J. ..... 247

**S**

Sauveur, Albert ..... 89
Schneidewind, Richard ..... 115
Schwartz, H. A. ..... 403
Seljesater, K. S. ..... 553
Sergeson, Robert ..... 368
Shipley, F. W. ..... 141
Spire, E. ..... 66

**T**

Todd, George B. ..... 41

**W**

Walters, Francis M. ..... 577
Wells, Cyril ..... 577
Wood, W. P. ..... 193

# INDEX OF SUBJECTS AND AUTHORS OF PAPERS

## VOLUME XIX

## TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

## NOVEMBER, 1931—JUNE, 1932

### A

Abnormal Grain Growth in High Speed Steel; Nature of—*G. R. Brophy and R. H. Harrington* ..... 385
Acid Open-Hearth Process; Formation and Elimination of Non-metallic Inclusions in the—*C. H. Herty, Jr., and J. E. Jacobs* ..... 271
Age Hardening Phenomena in Typical Fusion-Weld Metal—*F. R. Hensel and E. I. Larsen* ..... 639
Aging in Low-Carbon Steels—*A. Allan Bates* ..... 449
Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 Iron-Chromium-Nickel—*H. D. Newell* ..... 673
Alloy Steels; Cold Treatment of Certain—*G. V. Luerssen and O. V. Greene* ..... 501
Alloyed Cast Iron; Characteristics of—*F. W. Shipley* ..... 141
Alpha-Delta Carburizing Steel; Nondeforming—*A. B. Kinzel* ..... 438
Alloys of Iron, Manganese and Carbon—*Francis M. Walters, Jr., Cyril Wells, M. Gensamer and John F. Eckel* ..... 577
Alloys; Magnetic and Mechanical Hardness of Dispersion Hardened Iron—*K. S. Seljesater and B. A. Rogers* ..... 553
Alloys; Precious Metal—*R. C. Brumfield* ..... 333
Application of X-Ray Diffraction Methods in the Study of Quench and Temper Structures of Carbon Spring Steels; Practical—*N. P. Goss* 182
Aspects of the Iron-Carbon Diagram; Some New—*H. A. Schwartz* .... 403

### B

Behavior of Some Irons and Steels Under Impact at Low Temperatures—*Robert Sergeson* ..... 368
Bierbaum, and Mohs Methods; Hardness of Chromium as Determined by the Vickers-Brinell—*Richard Schneidewind* ..... 115
Brinell, Bierbaum, and Mohs Methods; Hardness of Chromium as Determined by the Vickers—*Richard Schneidewind* ..... 115

### C

Carbide Tools; Cemented Tantalum—*Floyd C. Kelley* ..... 233
Carbon; Alloys of Iron, Manganese and—*Francis M. Walters, Jr., Cyril Wells, M. Gensamer and John F. Eckel* ..... 577
Carbon Diagram; Some New Aspects of the Iron—*H. A. Schwartz* .... 403
Carbon Spring Steels; Practical Application of X-Ray Diffraction Methods in the Study of Quench and Temper Structures of—*N. P. Goss* ..... 182
Carbon Steels; Aging in Low—*A. Allan Bates* ..... 449
Carbon Steels; Resistance to Wear of—*Samuel J. Rosenberg* ..... 247
Carburizing Steel; Nondeforming Alpha-Delta—*A. B. Kinzel* ..... 438
Cases; Correlation of the Crystal Structures and Hardnesses of Nitrided —*Oscar E. Harder and George B. Todd* ..... 41
Cast Iron; Characteristics of Alloyed—*F. W. Shipley* ..... 141
Cemented Tantalum Carbide Tools—*Floyd C. Kelley* ..... 233

Characteristics of Alloyed Cast Iron—*F. W. Shipley* ..... 141
Characteristics of Steel Rails at Low Temperatures; Impact—*J. F. Cunningham and James Gilchrist* ..... 624
Chromium Hardness as Determined by the Vickers-Brinell, Bierbaum, and Mohs Methods—*Richard Schneidewind* ..... 115
Chromium-Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 Iron—*H. D. Newell* ..... 673
Cold Treatment of Certain Alloy Steels—*G. V. Luerssen and O. V. Greene* 501
Constitutional Diagram; Evolution of the Iron-Oxygen—*C. H. Mathewson, E. Spire and W. E. Milligan* ..... 66
Correlation of the Crystal Structures and Hardnesses of Nitrided Cases—*Oscar E. Harder and George B. Todd* ..... 41
Corrosion Resistance of the 18-8 Iron-Chromium-Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and —*H. D. Newell* ..... 673
Crystal Structures and Hardnesses of Nitrided Cases; Correlation of—*Oscar E. Harder and George B. Todd* ..... 41

**D**

Delta Carburizing Steel; Nondeforming Alpha—*A. B. Kinzel* ..... 438
Dendrites in Nickel Steel—*Albert Sauveur and E. L. Reed* ..... 89
Diagram; Evolution of the Iron-Oxygen Constitutional Diagram—*C. H. Mathewson, E. Spire and W. E. Milligan* ..... 66
Diagram; Some New Aspects of the Iron-Carbon—*H. A. Schwartz* ..... 403
Diffraction Methods in the Study of Quench and Temper Structures of Carbon Spring Steels; Practical Application of X-Ray—*N. P. Goss*.. 182
Dispersion Hardened Iron Alloys; Magnetic and Mechanical Hardness of —*K. S. Seljesater and B. A. Rogers* ..... 553

**E**

Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 Iron-Chromium-Nickel Alloy for—*H. D. Newell* ..... 673
Elevated Temperatures by Reaction with Gases and the Properties of the Resulting Oxides; Scaling of Steel at—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193
Elimination of Nonmetallic Inclusions in the Acid Open-Hearth Process; Formation and—*C. H. Herty, Jr., and J. E. Jacobs* ..... 271
Endurance Properties of Some Well-Known Steels in Steam—*T. S. Fuller* 97
Evolution of the Iron-Oxygen Constitutional Diagram—*C. H. Mathewson, E. Spire and W. E. Milligan.* ..... 66

**F**

Formation and Elimination of Nonmetallic Inclusions in the Acid Open-Hearth Process—*C. H. Herty, Jr., and J. E. Jacobs* ..... 271
Fusion-Weld Metal; Age Hardening Phenomena in Typical—*F. R. Hensel and E. I. Larsen* ..... 639

**G**

Gamma Rays; Inspection of Welds with—*Gilbert E. Doan* ..... 752
Gases and the Properties of the Resulting Oxides; Scaling of Steel at Elevated Temperatures by Reaction with—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193
Grain Growth in High Speed Steel; Nature of Abnormal—*G. R. Brophy and R. H. Harrington* ..... 385
Grain Size on the Properties and Corrosion Resistance of the 18-8 Chromium-Nickel Alloy for Elevated Temperature Service; Influence of—*H. D. Newell* ..... 673
Growth in High Speed Steel; Nature of Abnormal Grain—*G. R. Brophy and R. H. Harrington* ..... 385

## H

Hardened Iron Alloys; Magnetic and Mechanical Hardness of Dispersion —*K. S. Seljesater and B. A. Rogers* ..... 553
Hardening Phenomena in Typical Fusion-Weld Metal; Age—*F. R. Henzel and E. L. Larsen* ..... 639
Hardness of Chromium as Determined by the Vickers-Brinell, Bierbaum, and Mohs Methods—*Richard Schneidewind* ..... 115
Hardness of Dispersion Hardened Iron Alloys; Magnetic and Mechanical —*K. S. Seljesater and B. A. Rogers* ..... 553
Hardnesses of Nitrided Cases; Correlation of the Crystal Structures— *Oscar E. Harder and George B. Todd* ..... 41
High Speed Steel; Nature of Abnormal Grain Growth in—*G. R. Brophy and R. H. Harrington* ..... 385
High Speed Steel; Some Physical Properties of—*Joseph V. Emmons* .. 289

## I

Identification of Inclusions in Steels—*Leland E. Grant* ..... 165
Impact at Low Temperatures; Behavior of Some Irons and Steels Under —*Robert Sergeson* ..... 368
Impact Characteristics of Steel Rails at Low Temperatures—*J. F. Cunningham and James Gilchrist* ..... 624
Inclusions in Steel; Nonmetallic—*Charles H. Herty, Jr.* ..... 1
Inclusions in the Acid Open-Hearth Process; Formation and Elimination of Nonmetallic—*C. H. Herty, Jr., and J. E. Jacobs* ..... 271
Inclusions in Steels; Identification of—*Leland E. Grant* ..... 165
Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 Iron-Chromium-Nickel Alloy for Elevated Temperature Service —*H. D. Newell* ..... 673
Inspection of Welds with Gamma Rays—*Gilbert E. Doan* ..... 752
Iron Alloys; Magnetic and Mechanical Hardness of Dispersion Hardened —*K. S. Seljesater and B. A. Rogers* ..... 553
Iron-Carbon Diagram; Some New Aspects of the—*H. A. Schwartz* ..... 403
Iron; Characteristics of Alloyed Cast—*F. W. Shipley* ..... 141
18-8 Iron-Chromium-Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion Resistance of the—*H. D. Newell* ..... 673
Iron-Chromium-Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 —*H. D. Newell* ..... 673
Iron, Manganese and Carbon; Alloys of—*Francis M. Walters, Jr., Cyril Wells, M. Gensamer and John F. Eckel* ..... 577
Iron-Oxygen Constitutional Diagram; Evolution of the—*C. H. Mathewson, E. Spire and W. E. Milligan* ..... 66
Irons and Steels Under Impact at Low Temperatures; Behavior of Some —*Robert Sergeson* ..... 368

## L

Low-Carbon Steels; Aging in—*A. Allan Bates* ..... 449
Low Temperatures; Behavior of Some Irons and Steels Under Impact at— *Robert Sergeson* ..... 368
Low Temperature; Impact Characteristics of Steel Rails at—*J. F. Cunningham and James Gilchrist* ..... 624

## M

Magnetic and Mechanical Hardness of Dispersion Hardened Iron Alloys —*K. S. Seljesater and B. A. Rogers* ..... 553
Manganese and Carbon; Alloys of Iron—*Francis N. Walters, Jr., Cyril Wells, M. Gensamer and John F. Eckel* ..... 577
Mechanical Hardness of Dispersion Hardened Iron Alloys; Magnetic and —*K. S. Seljesater and B. A. Rogers* ..... 553

Metal; Age Hardening Phenomena in Typical Fusion-Weld—*F. R. Hensel and E. I. Larsen* ..... 639
Metal Alloys; Precious—*R. C. Brumfield* ..... 333
Methods in the Study of Quench and Temper Structures of Carbon Spring Steels; Practical Application of X-Ray Diffraction—*N. P. Goss*.... 182
Mohs Method; Hardness of Chromium as Determined by the Vickers-Brinell, Bierbaum, and—*Richard Schneidewind* ..... 115

**N**

Nature of Abnormal Grain Growth in High Speed Steel—*G. R. Brophy and R. H. Harrington* ..... 385
New Aspects of the Iron-Carbon Diagram; Some—*H. A. Schwartz* .... 403
Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 Iron-Chromium-—*H. D. Newell* ..... 673
Nickel Steel; Dendrites in—*Albert Sauveur and E. L. Reed* ..... 89
Nitrided Cases; Correlation of the Crystal Structures and Hardnesses of —*Oscar E. Harder and George B. Todd* ..... 41
Nitriding; Short-Time—*John J. Egan* ..... 481
Nondeforming Alpha-Delta Carburizing Steel—*A. B. Kinzel* ..... 438
Nonmetallic Inclusions in Steel—*Charles H. Herty, Jr.* ..... 1
Nonmetallic Inclusions in the Acid Open-Hearth Process; Formation and Elimination of—*C. H. Herty, Jr., and J. E. Jacobs* ..... 271

**O**

Open-Hearth Process; Formation and Elimination of Nonmetallic Inclusions in the Acid—*C. H. Herty, Jr., and J. E. Jacobs* ..... 271
Oxides; Scaling of Steel at Elevated Temperatures by Reaction with Gases and the Properties of the Resulting—*D. W. Murphy, W. P. Wood and W. E. Murphy* ..... 193
Oxygen-Iron Constitutional Diagram; Evolution of—*C. H. Mathewson, E. Spire and W. E. Milligan* ..... 66

**P**

Physical Properties of High Speed Steel; Some—*Joseph V. Emmons* .... 289
Practical Application of X-Ray Diffraction Methods in the Study of Quench and Temper Structures of Carbon Spring Steel—*N. P. Goss* 182
Precious Metal Alloys—*R. C. Brumfield* ..... 333
Properties and Corrosion Resistance of the 18-8 Iron-Chromium-Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the—*H. D. Newell* ..... 673
Proper of High Speed Steel; Some Physical—*Joseph V. Emmons* .... 289
Properties of Some Well-Known Steels in Steam; Endurance—*T. S. Fuller* ..... 97
Properties of the Resulting Oxides; Scaling of Steel at Elevated Temperatures by Reaction with Gases and the—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193

**Q**

Quench and Temper Structures of Carbon Spring Steels; Practical Application of X-Ray Diffraction Methods in the Study of—*N. P. Goss* 182

**R**

Rails at Low Temperatures; Impact Characteristics of Steel—*J. F. Cunningham and James Gilchrist* ..... 624
Reaction with Gases and the Properties of the Resulting Oxides; Scaling of Steel at Elevated Temperatures by—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193
Resistance of the 18-8 Iron-Chromium-Nickel Alloy for Elevated Temperature Service; Influence of Grain Size on the Properties and Corrosion—*H. D. Newell* ..... 673
Resistance to Wear of Carbon Steels—*Samuel J. Rosenberg* ..... 247

## S

Scaling of Steel at Elevated Temperatures by Reaction with Gases and the Properties of the Resulting Oxides—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193
Short-Time Nitriding—*John J. Egan* ..... 481
Some New Aspects of the Iron-Carbon Diagram—*H. A. Schwartz* ..... 403
Spring Steels; Practical Application of X-Ray Diffraction Methods in the Study of Quench and Temper Structures of Carbon—*N. P. Goss*.... 182
Stainless Steels; Influence of Grain Size on the Properties and Corrosion Resistance of the 18-8 Iron-Chromium-Nickel Alloy for Elevated Temperature Service—*H. D. Newell* ..... 673
Steam; Endurance Properties of Some Well-Known Steels in—*T. S. Fuller* ..... 97
Steel; Dendrites in Nickel—*Albert Sauveur and E. L. Reed* ..... 89
Steel; Nature of Abnormal Grain Growth in High Speed Steel—*G. R. Brophy and R. H. Harrington* ..... 385
Steel; Nondeforming Alpha-Delta Carburizing—*A. B. Kinzel* ..... 438
Steel; Nonmetallic Inclusions in—*Charles H. Herty, Jr.* ..... 1
Steel; Some Physical Properties of High Speed—*Joseph V. Emmons* .. 289
Steel at Elevated Temperatures by Reaction with Gases and the Properties of the Resulting Oxides; Scaling of—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193
Steel Rails at Low Temperatures; Impact Characteristics of—*J. F. Cunningham and James Gilchrist* ..... 624
Steels; Aging in Low-Carbon—*A. Allan Bates* ..... 449
Steels; Cold Treatment of Certain Alloy—*G. V. Luerssen and O. V. Greene* ..... 501
Steels; Identification of Inclusions in—*Leland E. Grant* ..... 165
Steels; Practical Application of X-Ray Diffraction Methods in the Study of Quench and Temper Structures of Carbon Spring—*N. P. Goss*.. 182
Steels; Resistance to Weat of Carbon—*Samuel J. Rosenberg* ..... 247
Steels in Steam; Endurance Properties of Some Well-Known—*T. S. Fuller* ..... 97
Steels Under Impact at Low Temperatures; Behavior of Some Irons and —*Robert Sergeson* ..... 368
Structures and Hardnesses of Nitrided Cases; Correlation of the Crystal—*Oscar E. Harder and George B. Todd* ..... 41
Structures of Carbon Spring Steels; Practical Application of X-Ray Diffraction Methods in the Study of Quench and Temper—*N. P. Goss* 182
Study of Quench and Temper Structures of Carbon Spring Steels; Practical Application of X-Ray Diffraction Methods in the—*N. P. Goss*.. 182

## T

Tantalum Carbide Tools; Cemented—*Floyd C. Kelley* ..... 233
Temper Structures of Carbon Spring Steels; Practical Application of X-Ray Diffraction Methods in the Study of Quench and—*N. P. Goss*.. 182
Temperatures; Behavior of Some Irons and Steels Under Impact at Low —*Robert Sergeson* ..... 368
Temperatures by Reaction with Gases and the Properties of the Resulting Oxides; Scaling of Steel at Elevated—*D. W. Murphy, W. P. Wood and W. E. Jominy* ..... 193
Tools; Cemented Tantalum Carbide—*Floyd C. Kelley* ..... 233
Treatment of Certain Alloy Steels; Cold—*G. V. Luerssen and O. V. Greene* ..... 501
Typical Fusion Weld Metal; Age Hardening Phenomena in—*F. R. Hensel and E. I. Larsen* ..... 639

## V

Vickers-Brinell, Bierbaum, and Mohs Methods; Hardness of Chromium as Determined by the—*Richard Schneidewind* ..... 115

## W

Wear of Carbon Steels; Resistance to—*Samuel J. Rosenberg* ..... 247
Weld Metal; Age Hardening Phenomena in Typical Fusion—*F. R. Hensel and E. I. Larsen* ..... 639
Welds with Gamma Rays; Inspection of—*Gilbert E. Doan* ..... 752
Well-Known Steels in Steam; Properties of—*T. S. Fuller* ..... 97

## X

X-Ray Diffraction Methods in the Study of Quench and Temper Structures of Carbon Spring Steels; Practical Application of—*N. P. Goss*.. 182
